## Chapter 3: Installation Instructions

### 3.1: Scenario

CV625-TB/TW/TBN/TWN/TBN/TWN supports a tracking range of 2-18m

### 3.2: Installation Instructions

PTZ installation and connection requires special skills. It is important to securely install the device. Pay attention to your safety and to the safety of those around you during the installation. Ensure the safety of the installation environment. Do not install the device to an unstable ceiling or at a height that may risk injury to people below.

**3.2.1** Please ensure installation safety, please do not mount the device on an unstable ceiling or in any location where it may fall, as this could lead to accidents.

**3.2.2** Please check that accessories in the box are complete. Please contact the supplier about any shortage, and make sure to keep the accessories in the box.

**3.2.3** Please choose an appropriate location for installation of camera in advance. Please determine the installation site according to the following requirements:

(A) Confirm the position for the object to be captured.

(B) Confirm whether the camera is set at a proper distance from light sources

### 3.2.4 Handling Instructions

- Do not hold the camera by its pan/tilt head.
- Do not manually rotate the camera head. Improper rotation may result in damage.

- Before installation, confirm the camera orientation relative to the object to be captured. It is recommended that the camera should be set at more than 1.5 meters from the object to be captured. Adjust the position to achieve your required shooting angle.

- The Camera (including metal plates) weighs approximately 2.7 kg. For ceiling mount, use a hanger that has obtained UL security approval to prevent the unit from falling.
- Regularly check the stability and strength of the camera installation.

## 3.2.5 Tilting the Panoramic Lens

The panoramic lens supports three tilt positions: **Up** / **Normal** / **Down**

- When the camera is installed at a height above 2 meters, it is recommended to adjust the angle of the lens.
- Upright Installation: Adjust to the [Down] position.
- Inverted Installation: Adjust to the [Up] position.
- After adjusting the tilt angle, please go to [Tracking]> [Lens Tilt Direction] and select the corresponding value in the web interface.

## 3.2.6 Installing the camera on the desk

Place the camera on a flat desk to ensure normal operation.

## 3.2.7 Mounting the camera to the ceiling

### (A) Prepare the following items:

- Accessories in the box (metal plates A, B, M3 screw silver x 8, black x 2)
- 4x screws for locking the ceiling mounted hanger
- Drilling, screwdriver and ladder
- For dimensions of the camera and metal plates, please refer to **Chapter 7**

## Addendum

### (A) Installation Steps

1. Fix the **Metal Plate A** to the camera base with:
2. 4x M3 silver screws
3. Lock the **Metal Plate B** on ceiling mounted hanger

### ! Caution:

- Please use a hanger that has obtained UL security approval.
- Please ensure space for cable access.

### 3.2.8 How to Remove

1. Remove the connecting cables from the camera
2. Loosen the three screws that fix the metal plates **A** and **B** by pushing to the left to remove the camera
3. Remove the three screws

## 3.3: Connection

### 3.3.1 Connecting devices

**NOTE:** Ethernet port supports PoE+ (IEEE802.3at)

## Chapter 5: Network Setting & Web Interface

### 5.1 Connecting Camera to Network

#### 5.1.1 Connection

Two common connection methods are shown below

##### 1. Connect via switch or router

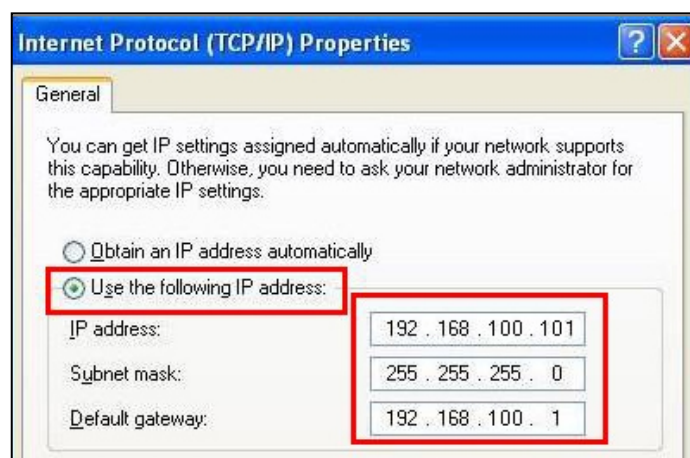

2. Connect directly via an Ethernet cable. The computer's IP address must match the network segment used by the camera.

E.g. The camera's default IP address is 192.168.100.100. The computer's IP address should be set to the same segment, such as 192.168.100.101.

- Modify the PC's network settings

## 5.1.2 Use a Browser to view Images

- Open the browser, and enter the IP address of the camera in the address bar

E.g.: <http://192.168.100.100> (default IP address)

- Enter the Username and Password

**NOTE:** Please refer to 5.2.12 System-User to change the default password.

### Marshall IP Camera

- Account: admin
- Password: 9999

## 5.1.3 Use an RTSP Player to View Live Images

Free software can be used for RTSP connection, such as VLC, Quick Time or PotPlayer. RTSP connection address formats are as follows:

- RTSP Stream 1 => <rtsp://camera IP:8554/hevc>  
<rtsp://camera IP:8557/h264>
- RTSP Stream 2 => <rtsp://camera IP:8556/h264>
- Panoramic Camera Output => <rtsp://camera IP:8553/h264>

If password authentication is enabled, the RTSP connection address is as follows:

- [rtsp://Username: Password@VC IP address:8557/stream1\(or stream2\)](rtsp://Username: Password@VC IP address:8557/stream1(or stream2))
- To enable password authentication function, please refer to [5.2.10 System-Network](#)

**Example:** Open the VLC software, click [Open Network Streaming], and enter the URL:

<rtsp://192.168.100.150:8557/h264>

### Network Protocol

Please enter a network URL:

<rtsp://192.168.100.150:8557/h264>

## Chapter 6: Troubleshooting

This chapter describes problems you may encounter while using camera. If you have questions, please refer to related chapters and follow all the suggested solutions.

If the problem still occurs, please contact your local distributor or Marshall Electronics.

No.	Problems	Solutions
1.	No power to the device	<ol style="list-style-type: none"> <li>1. Make sure you plug in the power cord</li> <li>2. When using a PoE connection, ensure that the power supply supports PoE+ (IEEE802.3at)</li> </ol>
2.	There is no image output from camera	<ol style="list-style-type: none"> <li>1. Check the power supply or PoE supply functions</li> <li>2. Confirm whether the camera resolution can be used with the connected display <ul style="list-style-type: none"> <li>■ If the camera is set to 4K resolution, output, confirm the display supports 4K output</li> </ul> </li> <li>3. Replace the cable and make sure it's not faulty</li> </ol>
3.	Camera image is severely delayed	Use 60/50 fps rather than 25/30 fps signals
4.	RS-232 cannot be controlled	<ol style="list-style-type: none"> <li>1. Confirm the connection is correct (RS-232 In/ Out)</li> <li>2. Please make sure the Baud rate setting is the same as the control device</li> </ol>
5.	ONVIF software cannot discover the camera	Please make sure that [System]> [Device]> [Camera ID]/ [Location] in the web page uses only English letters or numbers. The ONVIF software cannot find the camera if you use special symbols or space
6.	The camera does not save relevant parameters (PTZ, AWB ...) after reboot	<p>Please make sure if the [Initial Position] is set to [Last MEM] from the setting menu or web page</p> <ul style="list-style-type: none"> <li>■ OSD Menu: [System]&gt; [Initial Position]</li> <li>■ Web page: [Live View]&gt; [Setting] &gt; [PTZ]&gt; [Initial Position]</li> </ul>
7.	How to log into the webpage if you have forgotten the password	Please contact your local distributor or Marshall technical support
8.	Admin password when deleting the User Account	Please contact your local distributor or Marshall technical support
9.	No image on SDI output when resolution is set to 1080i	<p>This camera does not support 1080i output over SDI. If 1080i is selected, the SDI port will continue to output 1080p.</p> <p>If 1080i is required, consider using an HDMI-to-SDI converter to output the image from the HDMI port.</p>
10.	No Image on HDMI output	Check EDID data from HDMI displays. EDID data is required for HDMI displays to function correctly.
